PROFILE

Let me introduce myself as appositive and self-motivated individual who will going to join your organization. My full name is Alamirew Wagaw Yehuala. I 'm now a software engineering student . I have 4:00 CGPA in this department. I have learnt javascript with react framework and nodejs with express framework for backend development with project like stop watcher, random password generator.

APPLICATION LETTER

At this present time, I 'm 4th year software engineering student. And I have the following qualification in progress with improvement:- I have 4:00 CGPA in this department. I have learnt javascript with react framework and nodejs with express framework for backend development with project like stop watcher, random password generator. So, I have great interest to learn and apply my knowledge with real work in your organization in this field of study or related to this. I would apply for 'technology improvement' position. more over for your reference my education back ground is enclosed in my cv, I am highly motivated, duty minded, persuasive and polite person. having this in your mind, I would like you to consider my application for this internship in line with my knowledge and motivation. If your organization, consider my internship application, I am ready to appear for anything what you want(interview) and what I want(improve knowledge and gain real skill in technology) without any hesitation.
