PROFILE

Let me introduce myself as appositive and self-motivated individual who will going to join your organization. My full name is Alamirew Wagaw Yehuala. I 'm a software engineering student.

APPLICATION LETTER

At this present time,I have already learnt and specialize different programming language with thier respective modern framework paricularly javascript with react framework for frontend and nodejs with express/nestjs framework for backend development. with this perspective , untill now i successfully develop hotel streamline platform, customer feedback monitoring system ,technosophia it Solution Website and so on. So, I have great interest to learn and apply my knowledge with real work in your organization in this field of study or related to this. I would apply for 'technology improvement" position. more over for your reference my education back ground is enclosed in my cv, I am highly motivated, duty minded, persuasive and polite person. having this in your mind, I would like you to consider my application for this internship in line with my knowledge and motivation. If your organization, consider my application, I am ready to appear for anything what you want(interview) and what I want(improve knowledge and gain real skill in technology and get hiring) without any hesitation.
